**CC:** Henry Hill

**Date:** March 8, 2010

**Re:** Monthly Report for February, 2010

We recorded 3.3 inches of rainfall in February and used 300.1 million gallons of water for the month. Our average usage was 10.7 million gallons per day (mgd) or about 99 gallons per person per day (gpcd). Our daily water usage ranged from a minimum of 7.6 mgd (70 gpcd) on February 11 to a maximum of 12.8 mgd (118 gpcd) on February 26. The February bacteriological and disinfectant by-product samples all tested negative for contamination. All of our chlorine samples tested within the normal limits for water quality.

We installed 101 water meters in January and we televised 100 private service lines for new homes.

We currently have 866 residents signed up and receiving free weekly e-mails for outdoor watering recommendations.

We inspected 720 fire hydrants and 112 manholes for proper operation. We repaired 3 sidewalks and installed 68 traffic signs.

We used about 17,600 gallons of unleaded fuel and about 5,380 gallons of diesel fuel in the month of February.

We collected about 2,500 residential tons and about 2,560 tons of commercial solid waste in January. Curbside recycling was about 1,040 tons in January.
